■ Performance Trend Analysis

Campaign Performance Over Time

■ AI-Generated Insights

Executive Summary: Analysis indicates significant performance deviations across 60 data points, primarily affecting Seattle, Los Angeles, New York, Miami, Chicago. The anomalies show an average click volume of 4424, which deviates substantially from baseline performance. This pattern suggests potential external factors such as regional events, technical disruptions, or seasonal fluctuations. Further investigation into campaign settings and market conditions is recommended.
